ClaimTrace

Earnings Brief Gatekeeper

Quarterly financial claims, evidence and human review

Internal review • October 27, 2026
Nightshift inference verified; complete AI investigation remains unmet

Current investigation workflow

Stage	Working behavior
Input	Company, quarter, cutoff and explicit analyst assertion
Retrieve	Attributed SEC evidence through SEC or existing Zetaris SQL
Check and challenge	Deterministic figures, units, periods, basis and bounded recheck
Human review	Immutable report, digest/revision protection and persistent decision

NVIDIA native proposals ran separately. No accepted completed model briefing is claimed.

Three observed financial cases

Analyst test input	Actual result	Review meaning
ISRG Q2 2026 EPS 2.29 USD/shares	Supported	Comparable quarter evidence agrees
Same quarter EPS 9.99 USD/shares	Contradicted	Actual EPS 2.29; difference −7.70
Cutoff July 20, 2026	No eligible filing evidence	Insufficient evidence before July 21 filing

Actual returned source modes: live_zetaris, cached_sec. These are deterministic controller outputs, not AI reasoning.

Evidence and review safeguards

01 Comparable financial facts

Exact quarter, units and GAAP basis; explicit calculation inputs; no year-to-date substitution.

02 Sources and publication dates

Primary citations, as-of filtering and source fingerprints. Unresolved findings remain visible.

03 Reviewed memory and durable decisions

H-MEM corrections require approval and persist. Recall is scoped; memory cannot replace financial evidence.

Sponsor functionality and gaps

Technology	Observed contribution	Remaining limitation
Zetaris	Real scoped financial SQL and SEC provenance	Initial approved view has limited company/period coverage
Meterless H-MEM	Actual store, reviewed correction and scoped recall	Hash embeddings; synthetic correction-test financial inputs
NVIDIA Nemotron	Genuine hosted calls and native financial tool proposals	Partial runs; no accepted completed model briefing
Nightshift	Authenticated NVIDIA inference and native proposal verified	Financial proposal rejected; no completed AI briefing
Cursor	Existing environment preserved for independent review	Qualifying human product contribution not documented

Actions required before submission

1 **Complete a valid model financial investigation**

A valid proposal and full investigation remain future work. No further model retries now.

2 **Confirm judge access to the merged application**

PRs 7–13 are merged. Public main is 0a6f6fb. Verify judge access and links.

3 **Review the actual demonstration assets**

Review the updated video and deck. Prepared HackOS draft includes uploaded media.

4 **Verify final submission details**

Solo roster: Amari. Check disclosures and links. Final submission still requires lead approval.
